Select correct option:

When their client is stubborn

When having problems related to confidentiality

When having problems related to their own competency

When personal problems and conflicts are affecting their therapeutic alliance

5. Assessment process leads to the _____ of individual's problem.

Select correct option:

Solution

Diagnosis

Prognosis

Prevention

6. The people who are particularly trained to assist mental health professionals are called what?

Select correct option:

Psychiatric nurses

Paraprofessionals

Health psychologists

Psychiatric social workers

7. Which of the following refers to an expected outcome of a disease?

Select correct option:

Solution

Testing

Prognosis

Observation

8. Analyse which could be considered as a relatively weak form of legislation for the profession in clinical psychology?

Select correct option:

Certification

Licensing

Examinations

Laws

9. All of the followings are the ethical responsibilities of a clinical psychologist towards their clients Except:

Select correct option:

Keeping confidentiality

Providing services in emergencies

Not cheating while doing business

Avoiding any kind of harm

10. A person who wants to get a doctorate degree in clinical psychology, should pursue which of the following?

Select correct option:

Graduate Work

Master's Degree Program

PhD / Psy.D Program

Post Doctorate

11. A person who wants to get a doctorate degree in clinical psychology, should pursue which of the following? Select correct option:

Graduate Work

Masters Degree Program

PhD / Psy.D Program

Post Doctorate

12. Which of the followings are psychological tests that are designed to measure a variety of mental functions, such as reasoning, comprehension, and judgment? Select correct option:

Intelligence tests

Achievement tests

Personality tests

Aptitude tests

13. Which of the following can be defined as the process of systematically gathering information about a person in relation to his or her environment so that decisions can be made, based on this information that is in the best interests of the individual? Select correct option:

Psychological assessment

Diagnosis

Psychoanalysis

History taking

14. Who used the concept of deviation IQ first time? Select correct option:

David Wechsler

Terman

Stanford

Binet

15. How many items are included in Millon Clinical Multi-Axial Inventory (MCMI)? Select correct option:

175

556

425

112

16. When, in a survey research respondents tend to say what they think the researcher wants to hear it is known as which of the followings? Select correct option:

Demand characteristics

Acquiescence

Reactivity

Response bias

17. Who was elected as the first president of American Psychological Association (APA) in 1892? Select correct option:

G. Stanley Hall

Wilhelm Wundt

Skinner

Watson

18. The degree of relationship is usually expressed as a number between _____.
Select correct option:

-1 and 0

0 and +1

-1 and +1

+1 and +2

19. Which of the following syndrome of present time was initially labeled as "shell shock" or "battle fatigue" after WW II? Select correct option:

Obsessive Compulsive Disorder

Post Traumatic Stress Disorder

Acute Stress Disorder

Oppositional Defiant Disorder

20. Which of the following does Not come under the category of ethical responsibility of clinical psychologists towards their clients? Select correct option:

Having honest friendship with client

Keeping confidentiality

Providing services in emergencies

Avoiding any kind of harassment

21. Albert Bandura's social learning theory is also known as which of the following? Select correct option:

Social cognitive theory

Social assessment theory

Social prediction theory

Theory of learned behavior

22. Which one of the following was first free-standing professional school of clinical psychology? Select correct option:

American National School of Clinical Psychology

School of Clinical psychology London

California School of Professional Psychology

Nether land institute of professional Psychology

23. Borderline personality disorder will be diagnosed on which of the followings? Select correct option:

Axis I

Axis II

Axis III

Axis IV

24. Analyze famous theories and point out which of the following theory provided grounds for the play therapy for children? Select correct option:

Social Learning Theory by Albert Bandura

Theory of Classical Conditioning by Ivan Pavlov

Theory of Operant Conditioning by Skinner

Psychoanalytical Theory by Sigmund Freud

25. Necessary qualification to become a psychiatrist is _____. Select correct option:

An M.B.B.S degree

Residency training

Training in clinical psychology

All of the given options

26. Analyze which could be considered as a relatively weak form of legislation for the profession in clinical psychology? **Select correct option:**

Certification

Licensing

Examinations

Laws

27. In which circumstances clinical psychologists are more likely to get guidance from another competent psychologist? **Select correct option:**

When their client is stubborn

When having problems related to confidentiality

When having problems related to their own competency

When personal problems and conflicts are affecting their therapeutic alliance

28. In which circumstances clinical psychologists are more likely to get guidance from another competent psychologist? **Select correct option:**

When their client is stubborn

When having problems related to confidentiality

When having problems related to their own competency

When personal problems and conflicts are affecting their therapeutic alliance

29. Which of the following program is referred to as the "Practitioner-oriented Model of Training"? **Select correct option:**

Psy.D

M.Sc

Training

Internship

30. Army Beta is a test for the assessment of which of the following skills? **Select correct option:**

Reading

Writing

Verbal

Nonverbal

31. Who developed Stanford-Binet Intelligence Test? **Select correct option:**

Rodgers

Wundt

Terman

Binet

32. Who believed that psychological problems, like physical illnesses, were caused by imbalances in the four bodily humors? **Select correct option:**

Hippocrates

Plato

Aristotle

Galen

33. Army Alpha is a test for the assessment of which of the following skills? **Select correct option:**

Reading

Writing

Verbal

Nonverbal

34. The maximum population of clinical psychologist gets involve in which of the following? **Select correct option:**

Community mental health center

Psychiatric hospital

Medical school

Private practice

35. Which of the following refers to an expected outcome of a disease? **Select correct option:**

Solution

Testing

Prognosis

Observation

36. Which field of psychology is related with the judicial and legal aspects of behavior? **Select correct option:**

Positive

Forensic

Sports

Developmental

37. Which one of the following offers certification of professional competence in different fields of psychology? **Select correct option:**

American Psychological Association

American Psychiatric Association

American Board of Professional Psychology

American Psychological Board of Legislation

38. Which of the following refers to an expected outcome of a disease? **Select correct option:**

Solution

Testing

Prognosis

Observation

39. People who are particularly trained to assist mental health professionals are called what? **Select correct option:**

Psychiatric nurses

Paraprofessionals

Health psychologists

Psychiatric social workers

40. Which of the following program is referred to as the “Practitioner-oriented Model of Training”? **Select correct option:**

Psy.D

M.Sc

Training

Internship

41. Who was not a significant figure of the middle ages? **Select correct option:**

Saint Thomas Aquinas

Nicholas Ores-me’

Paracelsus

Sigmund Freud

42. Who was appointed by Carl Rogers, the president of APA to formulate a model for training in clinical psychology? **Select correct option:**

David Shakow

Drabman

Donald Peterson

Beutler

43. Was not a significant figure of the Greek era? **Select correct option:**

Hippocrates

Plato

Aristotle

Paracelsus

44. of the following are the ethical responsibility of a clinical psychologist towards their clients Except: **Select correct option:**

Keeping confidentiality

Providing services in emergencies

Not cheating while doing business

Avoiding any kind of harm

45. When psychologists agree to provide services to a person or entity at the request of a third party? **Select correct option:**

When third part is offering more fees

When client is easily treatable

When shorter therapeutic sessions are required

When psychologists are required by organizations like courts

46. _____ posits that personality is the sum of an individual’s observable responses to the outside world. Select correct option:

Behaviorism

Psychoanalysis

Functionalism

Existentialism

47. For behavior to be considered abnormal, it must create some degree of social, interpersonal, or occupational problems for the individual. It is known as: Select correct option:

Conformity to norms

The experience of subjective distress

Disability or dysfunction

Deviation from social standards

48. Which of the followings definitions are limited by the difficulty of establishing agreed-upon cutoff points? Select correct option:

Conformity oriented

Consistency oriented

Orthodoxy oriented

Tradition oriented

49. Analyze which of the following scale in MMPI do NOT help to detect malingering or other response sets or test-taking attitudes, and carelessness or misunderstanding? Select correct option:

Hypomania Scale

Frequency Scale

Lie Scale

Defensiveness Scale

50. Who presented the Triarchic Theory of Multiple Intelligences? Select correct option:

Sternberg

Galton

Gardner

Cattell

51. The assessment process begins with a _____. Select correct option:

Referral

Smile

Assessment

Diagnosis

52. Which of the followings is the focus of assessment that include mood states, trait levels of emotions and emotional reactivity? Select correct option:

Cognitive processes

Biological processes

Emotional processes

Psycho-physiological processes

53. Which of the following validity is demonstrated when test scores accurately predict some behavior or event in the future? Select correct option:

Predictive Validity

Content Validity

Concurrent Validity

Future Validity

54. Classical conditioning is grounded in the research of which of the followings? Select correct option:

Ivan Pavlov

Albert Bandura

B. F. Skinner

Sigmund Freud

55. Which of the following refers to the extent that an individual makes similar responses to the same test stimuli on repeated occasions?

Select correct option:

Test-retest reliability

Validity

Construct

Item analysis

56. Albert Bandura's social learning theory is also known as which of the following? **Select correct option:**

Social cognitive theory

Social assessment theory

Social prediction theory

Theory of learned behavior

57. What is concerned with human behavior or psychopathology, and the results of previous research? **Select correct option:**

Theory

Hypothesis

Variable

Levels of variables

58. Which of the following occur when the patient is in the middle of a significant and often traumatic or life threatening disaster? **Select correct option:**

Mental Status Examination Interview

The Intake Interview

The Crisis Interview

The Diagnostic Interview

59. For behavior to be considered abnormal, it must create some degree of social, interpersonal, or occupational problems for the individual. It is known as: **Select correct option:**

Conformity to norms

The experience of subjective distress

Disability or dysfunction

Deviation from social standards

60. Classical conditioning is grounded in the research of which of the followings? **Select correct option:**

Ivan Pavlov

Albert Bandura

B. F. Skinner

Sigmund Freud

61. Borderline personality disorder will be diagnosed on which of the followings? **Select correct option:**

Axis I

Axis II

Axis III

Axis IV

62. A correlation simply means that the _____. **Select correct option:**

Events are linked in some way

Events are not at all linked

Events are neutral

Events are in diverse situations

63. Which of the following validity is demonstrated when test scores accurately predict some behavior or event in the future? **Select correct option:**

Predictive Validity

Content Validity

Concurrent Validity

Future Validity

64. Analyze according to “Bingham” and “Moore”, which of the following is a conversation with a purpose? **Select correct option:**

Interview

Crisis interview

The Diagnostic Interview

Mental Status Examination Interview

65. Analyze which of the following is NOT included in Stanford-Binet Intelligence Scale? Select correct option:

Verbal Reasoning

Abstract/Visual Reasoning

Quantitative Reasoning

Writing expression

66. Advantages of clinical interview do NOT include which of the following?

Select correct option:

Opportunity to gossip

Inexpensive

Taps both verbal and non verbal behavior

Flexible

67. Who presented the theory of multiple intelligences? Select correct option:

Galton

Gardner

Guilford

Cattell

68. Analyze which of the following scale in MMPI do NOT help to detect malingering or other response sets or test-taking attitudes, and carelessness or misunderstanding? Select correct option:

Hypomania Scale

Frequency Scale

Lie Scale

Defensiveness Scale

69. Which one of the following states that results are due to systematic differences in research participants assigned to different conditions or treatments? Select correct option:

Testing effect

Subject effect or selection effect

History effect

Experimenter expectancy effect

ALL OF THE ABOVE

70. The assessment process begins with a _____. Select correct option:

Referral

Smile

Assessment

Diagnosis

71. Analyze which of the following is NOT included in Stanford-Binet Intelligence Scale? Select correct option:

Verbal Reasoning

Abstract/Visual Reasoning

Quantitative Reasoning

Writing expression

72. Which one of the following states that differences are due to chance or that there are no differences between treatments? Select correct option:

Null hypothesis

Alternative hypotheses

Research hypothesis

Experimental hypothesis

73. Analyze which of the following statement about WISC is WRONG? Select correct option:

The WISC is designed to measure human intelligence as reflected in both verbal and nonverbal abilities.

WISC is used in neuropsychological evaluation

WISC can be used as part of the diagnostic criteria for mental retardation

WISC can be used as part of the diagnostic criteria for Antisocial Personality Disorder

74. What refers to the relationship between patient and clinician? Select correct option:

Rapport

Friendship

Closeness

Frankness

75. When, in a survey research respondents tend to say what they think the researcher wants to hear it is known as which of the followings? Select correct option:

Demand characteristics

Acquiescence

Reactivity

Response bias

76. Which of the followings refers to the therapist's openness and genuineness, the willingness to relate to clients without hiding behind a professional façade? Select correct option:

Positive regard

Congruence

Reflection

Empathy

77. Which of the followings includes psy-chology's contributions to the enhancement of health, the prevention and treatment of illness, the identification of health risk factors, the improvement of the health care system, and shaping of public opinion with regard to health? Select correct option:

Health psychology

Muslim psychology

Cognitive psychology

Experimental psychology

78. Which of the following hypothesizes that behavior is a function of threat appraisal? Select correct option:

Protection motivation theory

Motivation theory

Defense inspiration theory

Resistance stimulation theory

79. Which one of the followings is Not among the basic recommendations that set the tone for the subsequent development of community psychology Joint Commission on Mental Health and Illness? Select correct option:

That mental health services should not be made available in the community

More and better research into mental health phenomena

A broadened definition of who may provide mental health services

That mental health services should be made available in the community

80. Which of the following is the basic goal of crisis intervention?

reach people in an acute state of stress and help them to prevent from becoming chronically ill

They provide psychoanalysis

They provide emotional support to addicts

They provide important and relevant information to students

81. ABC's of REBT does not include which of the followings? Select correct option:

Activating events

Beliefs

Consequences

Control

82. Which of the followings is a form of psychotherapy in which a small, carefully selected group of individuals meets regularly with a therapist? Select correct option:

Group therapy

Play therapy

Couple therapy

None of the given options

83. In which of the followings, the entire-family is seen at the same time by one therapist? Select correct option:

Conjoint family therapy

Joint family therapy

Family therapy

Closed family therapy

84. A common feeling among group therapy members, especially when a group is just starting, is that of being isolated, unique, and apart from others is termed as what of the followings? Select correct option:

Universality

Altruism

Improved social learning skills

Imitative behavior

85. If a client is asked to close his/her eyes and, with the guidance of the therapist, slowly imagine a scene of the past or future event, this technique will be referring to which of the followings? Select correct option:

Enactment and dramatization

Dream work

Guided Fantasy

Awareness of self and others

86. Which of the followings is not a synonymous to person-centered therapy? Select correct option:

Client-centered therapy

Non-directive therapy

Rogerian therapy

Existential therapy

87. If a clinician might be asked to consult with a colleague on a diagnostic problem involving a specific patient, it will be referring to which of the followings? Select correct option:

Client-centered case consultation

Consultee-centered case consultation

Program-centered administrative consultation

Consultee-centered administrative consultation

88. Which of the following refers to cases in which the brain has been shifted from its normal position and pressed against the skull which results brain tissues to be bruised? Select correct option:

Contusions

Concussions

Lacerations

Occlusions

89. Which of the followings deals with the understanding assessment, and treatment of behaviors directly related to the functioning of the brain? Select correct option:

Neuropsychology

Neurology

Psychology

Neuropsychological psychology

90. The recognition that both psychological and social factors influence illness and health is the basis of an influential perspective known as what of the followings? Select correct option:

Biopsychosocial model

Psychological model

Sociological model

Biological model

91. A common feeling among group therapy members, especially when a group is just starting, is that of being isolated, unique, and apart from others is termed as what of the followings? Select correct option:

Universality

Altruism

Improved social learning skills

Imitative behavior

92. Who developed psychodrama? Select correct option:

Jacob Moreno

William Wundt

Eric Berne

Elbert Ellis

93. Which of the followings is not a synonymous to person-centered therapy? Select correct option:

Client-centered therapy

Non-directive therapy

Rogerian therapy

Existential therapy

94. Which of the followings refers to the integration of the behavioral sciences with the practice and science of medicine? Select correct option:

Behavioral medicine

Medication

Psychotherapy

Treatment

95. Which of the following hypothesizes that behavior is a function of threat appraisal? Select correct option:

Protection motivation theory

Motivation theory

Defense inspiration theory

Resistance stimulation theory

96. Which of the followings seeks to modify or change patterns of thinking that are believed to contribute to a patient's problems? Select correct option:

Cognitive-behavioral therapy

Rational Emotive therapy

Behavioral therapy

Psychoanalytic therapy

97. Who advocated the use of modeling? Select correct option:

Albert Bandura

Carl Rogers

Sigmund Freud

Carl Jung

98. Which of the following means that the therapist accepts the client totally for who he or she without disapproving of particular feelings, actions, or characteristics? Select correct option:

Unconditional positive regard

Congruence

Reflection

Empathy

99. In which of the followings each family member sees a different therapist? Select correct option:

Conjoint family therapy

Concurrent family

Collaborative family therapy

Behavioral family therapy

100. Which of the followings is a form of psychotherapy in which a small, carefully selected group of individuals meets regularly with a therapist? Select correct option:

Group therapy

Play therapy

Couple therapy

None of the given options

101. Which of the followings is a synonym to couple's therapy? Select correct option:

Couple counseling

Pair therapy

Marriage counseling

Combine therapy

102. Who developed systematic desensitization? Select correct option:

Wolpe

Chambless

Rogers

Wundt

103. Which of the followings includes psychology's contributions to the enhancement of health, the prevention and treatment of illness, the identification of health risk factors, the improvement of the health care system, and shaping of public opinion with regard to health? Select correct option:

Health psychology

Muslim psychology

Cognitive psychology

Experimental psychology

104. Analyze which of the following statement about community psychology is wrong? Select correct option:

Community psychology is typically practiced in clinics

Community psychology is typically not practiced in clinics

Community psychology place attention on prevention of problems rather than treatment of existing problems

Attempts are made to share psychology with others via consultation

105. Which of the following phases encompasses the development of specific, alternative solutions and strategies of problem solving? Select correct option:

The entry or preparatory phase

The beginning or warming-up phase

The alternative action phase

Termination

106. Which of the following phases encompasses the development of specific, alternative solutions and strategies of problem solving? Select correct option:

The entry or preparatory phase

The beginning or warming-up phase

The alternative action phase

Termination

107. Who developed client centered therapy? Select correct option:

Carl Rogers

Carl Jung

Sigmund Freud

Maslow

108. If a clinician might be asked to consult with a colleague on a diagnostic problem involving a specific patient, it will be referring to which of the followings? Select correct option:

Client-centered case consultation

Consultee-centered case consultation
Program-centered administrative consultation
Consultee-centered administrative consultation

109. If a person laughs or weeps too easily and often inappropriately; for example shifts from joy to tears to anger very rapidly, his problem will be termed as what of the followings? Select correct option:

Shallow and labile affect

Impaired judgment
Impaired orientation
Impaired memory

110. A sizable amount of research has been done to improve psychological preparation for surgery; interventions do not include which of the followings? Select correct option:

Relaxation strategies
Basic information about the procedures to be used
Cognitive coping skills

Deception about bodily sensations experienced during the procedures

111. A common feeling among group therapy members, especially when a group is just starting, is that of being isolated, unique, and apart from others is termed as what of the followings? Select correct option:

Universality

Altruism
Improved social learning skills
Imitative behavior

112. Which of the followings seeks to modify or change patterns of thinking that are believed to contribute to a patient's problems? Select correct option:

Cognitive-behavioral therapy

Rational Emotive therapy
Behavioral therapy
Psychoanalytic therapy

113. Analyze which of the following statement about community psychology is wrong? Select correct option:

Community psychology is typically practiced in clinics

Community psychology is typically not practiced in clinics
Community psychology place attention on prevention of problems rather than treatment of existing problems
Attempts are made to share psychology with others via consultation

114. In which of the followings, the entire-family is seen at the same time by one therapist? Select correct option:

Conjoint family therapy

Joint family therapy
Family therapy
Closed family therapy

115. Who among the followings is not a significant figure of behaviorism? Select correct option:

Watson
Pavlov
Rayner
Freud

116. Which of the followings is not a synonymous to person-centered therapy? Select correct option:

- Client-centered therapy
- Non-directive therapy
- Rogerian therapy
- Existential therapy

117. Goal of which of the followings light to moderate drinking and clients are taught to develop alternative coping responses and to closely monitor alcohol intake? Select correct option:

- Proscribed drinking
- Controlled drinking
- Forbidden drinking
- Restricted drinking

PSY401 Multiple Choice Questions Solved

- A 1. Freud's theory was based on the belief that neuroses were caused by
- a. repressed memories, motives, and conflicts.

Select correct option:

Health psychology

Muslim psychology

Cognitive psychology

Experimental psychology

Which of the following hypothesizes that behavior is a function of threat appraisal?

Select correct option:

Protection motivation theory

Motivation theory

Defense inspiration theory

Resistance stimulation theory

Which one of the followings is Not among the basic recommendations that set the tone for the subsequent development of community psychology Joint Commission on Mental Health and Illness?

Select correct option:

That mental health services should not be made available in the community

More and better research into mental health phenomena

A broadened definition of who may provide mental health services

That mental health services should be made available in the community

Which of the following is the basic goal of crisis intervention?

Select correct option:

To reach people in an acute state of stress and help them to prevent from becoming chronically ill

They provide psychoanalysis

They provide emotional support to addicts

They provide important and relevant information to students

ABC's of REBT does not include which of the followings?

Select correct option:

Activating events

Beliefs

Consequences

Control

Which of the followings is a form of psychotherapy in which a small, carefully selected group of individuals meets regularly with a therapist?

Select correct option:

Group therapy

Play therapy

Couple therapy

None of the given options

In which of the followings, the entire-family is seen at the same time by one therapist?

Select correct option:

Conjoint family therapy

Joint family therapy

Family therapy

Closed family therapy

A common feeling among group therapy members, especially when a group is just starting, is that of being isolated, unique, and apart from others is termed as what of the followings?

Select correct option:

Universality

Altruism

Improved social learning skills

Imitative behavior

If a client is asked to close his/her eyes and, with the guidance of the therapist, slowly imagine a scene of the past or future event, this technique will be referring to which of the followings?

Select correct option:

Enactment and dramatization

Dream work

Guided Fantasy

Awareness of self and others

Which of the followings is not a synonymous to person-centered therapy?

Select correct option:

Client-centered therapy

Non-directive therapy

Rogerian therapy

Existential therapy

If a clinician might be asked to consult with a colleague on a diagnostic problem involving a specific patient, it will be referring to which of the followings?

Select correct option:

Client-centered case consultation

Consultee-centered case consultation

Program-centered administrative consultation

Consultee-centered administrative consultation

Which of the following refers to cases in which the brain has been shifted from its normal position and pressed against the skull which results brain tissues to be bruised?

Select correct option:

Contusions

Concussions

Lacerations

Occlusions

Which of the followings deals with the understanding assessment, and treatment of behaviors directly related to the functioning of the brain?

Select correct option:

Neuro-psychology

Neurology

Psychology

Neuro psychological psychology

The recognition that both psychological and social factors influence illness and health is the basis of an influential perspective known as what of the followings?

Select correct option:

Biopsychosocial model

Psychological model

Sociological model

Biological model

A common feeling among group therapy members, especially when a group is just starting, is that of being isolated, unique, and apart from others is termed as what of the followings?

Select correct option:

Universality

Altruism

Improved social learning skills

Imitative behavior

Who developed psychodrama?

Select correct option:

Jacob Moreno

William Wundt

Eric Berne
Elbert Ellis

Which of the followings is not a synonymous to person-centered therapy?
Select correct option:

Client-centered therapy
Non-directive therapy
Rogerian therapy
Existential therapy

Which of the followings refers to the integration of the be-havioral sciences with the practice and science of medicine?
Select correct option:

Behavioral medicine
Medication
Psychotherapy
Treatment

Which of the following hypothesizes that behavior is a function of threat appraisal?
Select correct option:

Protection motivation theory
Motivation theory
Defense inspiration theory
Resistance stimulation theory

Which of the followings seeks to modify or change patterns of thinking that are believed to contribute to a patient's problems?
Select correct option:

Cognitive-beha-vioral therapy
Rational Emotive therapy
Behavioral therapy
Psychoanalytic therapy

Who advocated the use of modeling?
Select correct option:

Albert Bandura
Carl Rogers
Sigmund Freud
Carl Jung

Which of the following means that the therapist accepts the client totally for who he or she without disapproving of particular feelings, actions, or characteristics?
Select correct option:

Unconditional positive regard

Congruence

Reflection

Empathy

In which of the followings each family member sees a different therapist?

Select correct option:

Conjoint family therapy

Concurrent family

Collaborative family therapy

Behavioral family therapy

Which of the followings is a form of psychotherapy in which a small, carefully selected group of individuals meets regularly with a therapist?

Select correct option:

Group therapy

Play therapy

Couple therapy

None of the given options

Which of the followings is a synonym to couple's therapy?

Select correct option:

Couple counseling

Pair therapy

Marriage counseling

Combine therapy

Who developed systematic desensitization?

Select correct option:

Wolpe

Chambless

Rogers

Wundt

Which of the followings includes psychology's contributions to the enhancement of health, the prevention and treatment of illness, the identification of health risk factors, the improvement of the health care system, and shaping of public opinion with regard to health?

Select correct option:

Health psychology

Muslim psychology

Cognitive psychology

Experimental psychology

Analyze which of the following statement about community psychology is wrong?

Select correct option:

Community psychology is typically practiced in clinics

Community psychology is typically not practiced in clinics

Community psychology place attention on prevention of problems rather than treatment of existing problems

Attempts are made to share psychology with others via consultation

Which of the following phases en-compasses the development of specific, alter-native solutions and strategies of problem solving?

Select correct option:

The entry or preparatory phase

The beginning or warming-up phase

The alternative action phase

Termination

Who developed client centered therapy?

Select correct option:

Carl Rogers

Carl Jung

Sigmund Freud

Maslow

If a person laughs or weeps too easily and often inappropriately; for example shifts from joy to tears to anger very rapidly, his problem will be termed as what of the followings?

Select correct option:

Shallow and labile affect

Impaired judgment

Impaired orientation

Impaired memory

A sizable amount of research has been done to improve psy-chological preparation for surgery; interventions do not include which of the followings?

Select correct option:

Relaxation strategies

Basic infor-mation about the procedures to be used

Cog-nitive coping skills

Deception about bodily sensations experienced during the procedures

A common feeling among group therapy members, especially when a group is just starting, is that of being isolated, unique, and apart from others is termed as what of the followings?

Select correct option:

Universality

Altruism

Improved social learning skills

Imitative behavior

Who among the followings is not a significant figure of behaviorism?

Select correct option:

Watson

Pavlov

Rayner

Freud

Goal of which of the followings light to moderate drinking and clients are taught to develop alternative coping responses and to closely monitor alcohol intake?

Select correct option:

Proscribed drinking

Controlled drinking

Forbidden drinking

Restricted drinking

PSY401 quiz#1

Analyze which could be considered as a relatively weak form of legislation for the profession in clinical psychology?

Select correct option:

Certification

Licensing

Examinations

Laws

In which circumstances clinical psychologists are more likely to get guidance from another competent psychologist?

Select correct option:

When their client is stubborn

When having problems related to confidentiality

When having problems related to their own competency

When personal problems and conflicts are effecting their therapeutic alliance

In which circumstances clinical psychologists are more likely to get guidance from another competent psychologist?

Select correct option:

When their client is stubborn

When having problems related to confidentiality

When having problems related to their own competency

When personal problems and conflicts are effecting their therapeutic alliance

Which of the following program is referred to as the “Practitioner-oriented Model of Training”?

Select correct option:

Psy.D

M.Sc

Training

Internship

Army Beta is a test for the assessment of which of the following skills?

Select correct option:

Reading

Writing

Verbal

Nonverbal

Who developed Stanford-Binet Intelligence Test?

Select correct option:

Rodgers

Wundt

Terman

Cattle

Who believed that psychological problems, like physical illnesses, were caused by imbalances in the four bodily humors?

Select correct option:

Hippocrates

Plato

Aristotle

Galen

Army Alpha is a test for the assessment of which of the following skills?

Select correct option:

Reading

Writing

Verbal

Nonverbal

The maximum population of clinical psychologist gets involve in which of the following?

Select correct option:

Community mental health center

Psychiatric hospital

Medical school

Private practice

Which of the following refers to an expected outcome of a disease?

Select correct option:

Solution

Testing

Prognosis

Observation

Which field of psychology is related with the judicial and legal aspects of behavior?

Select correct option:

Positive

Forensic

Sports

Developmental

Which one of the following offers certification of professional competence in different fields of psychology?

Select correct option:

American Psychological Association

American Psychiatric Association

American Board of Professional Psychology

American Psychological Board of Legislation

Which of the following refers to an expected outcome of a disease?

Select correct option:

Solution

Testing

Prognosis

Observation

people who are particularly trained to assist mental health professionals are called what?

Select correct option:

Psychiatric nurses

Paraprofessionals

Health psychologists

Psychiatric social workers

Which of the following program is referred to as the “Practitioner-oriented Model of Training”?

Select correct option:

Psy.D

M.Sc

Training

Internship

Who was not a significant figure of the middle ages?

Select correct option:

Saint Thomas Aquinas

Nicholas Ores-me’

Paracelsus

Sigmund Freud

Who was appointed by Carl Rogers, the president of APA to formulate a model for training in clinical psychology?

Select correct option:

David Shakow

Drabman

Donald Peterson

Beutler

was not a significant figure of the Greek era?

Select correct option:

Hippocrates

Plato

Aristotle

Paracelsus

of the following are the ethical responsibility of a clinical psychologist towards their clients
Except:

Select correct option:

Keeping confidentiality

Providing services in emergencies

Not cheating while doing business

Avoiding any kind of harm

When psychologists agree to provide services to a person or entity at the request of a third party?

Select correct option:

When third part is offering more fees

When client is easily treatable

When shorter therapeutic sessions are required

When psychologists are required by organizations like courts

PSY401 quiz#2

_____ posits that personality is the sum of an individual's observable responses to the outside world.

Select correct option:

Behaviorism

Psychoanalysis

Functionalism

Existentialism

For behavior to be considered abnormal, it must create some degree of social, interpersonal, or occupational problems for the individual. It is known as:

Select correct option:

Conformity to norms

The experience of subjective distress

Disability or dysfunction

Deviation from social standards

Which of the followings definitions are limited by the difficulty of establishing agreed-upon cutoff points?

Select correct option:

Conformity oriented

Consistency oriented

Orthodoxy oriented

Tradition oriented

Analyze which of the following scale in MMPI do NOT help to detect malingering or other response sets or test-taking attitudes, and carelessness or misunderstanding?

Select correct option:

Hypomania Scale

Frequency Scale

Lie Scale

Defensiveness Scale

Who presented the Triarchic Theory of Multiple Intelligences?

Select correct option:

Sternberg

Galton

Gardner

Cattell

The assessment process begins with a _____.

Select correct option:

Referral

Smile

Assessment

Diagnosis

Which of the followings is the focus of assessment that include mood states, trait levels of emotions and emotional reactivity?

Select correct option:

Cognitive processes

Biological processes

Emotional processes

Psycho-physiological processes

Which of the following validity is demonstrated when test scores accurately predict some behavior or event in the future?

Select correct option:

Predictive Validity

Content Validity

Concurrent Validity

Future Validity

Classical conditioning is grounded in the research of which of the followings?

Select correct option:

Ivan Pavlov

Albert Bandura

B. F. Skinner

Sigmund Freud

Which of the following refers to the extent that an individual makes similar responses to the same test stimuli on repeated occasions?

Select correct option:

Test-retest reliability

Validity

Construct

Item analysis

Analyze according to “Bingham” and “Moore”, which of the following is a conversation with a purpose?

▶ **Select correct option:**

Analyze which of the following is NOT included in Stanford-Binet Intelligence Scale?

Select correct option:

Verbal Reasoning

Abstract/Visual Reasoning

Quantitative Reasoning

Writing expression

Advantages of clinical interview do NOT include which of the following?

Select correct option:

Opportunity to gossip

Inexpensive

Taps both verbal and non verbal behavior

Flexible

Who presented the theory of multiple intelligences?

Select correct option:

Galton

Gardner

Guilford

Cattell

Analyze which of the following scale in MMPI do NOT help to detect malingering or other response sets or test-taking attitudes, and carelessness or misunderstanding?

Select correct option:

Hypomania Scale

Frequency Scale

Lie Scale

Defensiveness Scale

Which one of the following states that results are due to systematic differences in research participants assigned to different conditions or treatments?

Select correct option:

Testing effect

Subject effect or selection effect

History effect

Experimenter expectancy effect

The assessment process begins with a _____.

Select correct option:

Referral

Smile

Assessment

Diagnosis

Analyze which of the following is NOT included in Stanford-Binet Intelligence Scale?

Select correct option:

Verbal Reasoning

Abstract/Visual Reasoning

Quantitative Reasoning

Writing expression

Which one of the following states that differences are due to chance or that there are no differences between treatments?

Select correct option:

Null hypothesis

Alternative hypotheses

Research hypothesis

Experimental hypothesis

Analyze which of the following statement about WISC is WRONG?

Select correct option:

The WISC is designed to measure human intelligence as reflected in both verbal and nonverbal abilities.

WISC is used in neuropsychological evaluation

WISC can be used as part of the diagnostic criteria for mental retardation

WISC can be used as part of the diagnostic criteria for Antisocial Personality Disorder

What refers to the relationship between patient and clinician?

Select correct option:

Rapport

Friendship

Closeness

Frankness

When, in a survey research respondents tend to say what they think the researcher wants to hear it is known as which of the followings?

Select correct option:

Demand characteristics

Acquiescence

Reactivity

Response bias

Which of the followings refers to the therapist's openness and genuineness, the willingness to relate to clients without hiding behind a professional façade?

Select correct option:

Positive regard

Congruence

Reflection

Empathy

Which of the followings refers to the therapist's openness and genuineness, the willingness to relate to clients without hiding behind a professional façade?

Select correct option:

Positive regard

Congruence

Reflection

Empathy

Which of the followings refers to the therapist's openness and genuineness, the willingness to relate to clients without hiding behind a professional façade?

Select correct option:

Positive regard

Congruence

Reflection

Empathy

Which of the followings refers to the therapist's openness and genuineness, the willingness to relate to clients without hiding behind a professional façade?

Select correct option:

Positive regard

Congruence

Reflection

Empathy

Which of the followings includes psychology's contributions to the enhancement of health, the prevention and treatment of illness, the identification of health risk factors, the improvement of the health care system, and shaping of public opinion with regard to health?

Select correct option:

Health psychology

Muslim psychology

Cognitive psychology

Experimental psychology

Which of the following hypothesizes that behavior is a function of threat appraisal?

Select correct option:

Protection motivation theory

Motivation theory

Defense inspiration theory

Resistance stimulation theory

Which one of the followings is Not among the basic recommendations that set the tone for the subsequent development of community psychology Joint Commission on Mental Health and Illness?

Select correct option:

That mental health services should not be made available in the community

More and better research into mental health phenomena

A broadened definition of who may provide mental health services

That mental health services should be made available in the community

Which of the following is the basic goal of crisis intervention?

Select correct option:

To reach people in an acute state of stress and help them to prevent from becoming chronically ill

They provide psychoanalysis

They provide emotional support to addicts

They provide important and relevant information to students

ABC's of REBT does not include which of the followings?

Select correct option:

Activating events

Beliefs

Consequences

Control

Which of the followings is a form of psychotherapy in which a small, carefully selected group of individuals meets regularly with a therapist?

Select correct option:

Group therapy

Play therapy

Couple therapy

None of the given options

In which of the followings, the entire-family is seen at the same time by one therapist?

Select correct option:

Conjoint family therapy

Joint family therapy

Family therapy

Closed family therapy

A common feeling among group therapy members, especially when a group is just starting, is that of being isolated, unique, and apart from others is termed as what of the followings?

Select correct option:

Universality

Altruism

Improved social learning skills

Imitative behavior

If a client is asked to close his/her eyes and, with the guidance of the therapist, slowly imagine a scene of the past or future event, this technique will be referring to which of the followings?

Analyze which of the following statement about community psychology is wrong?

Select correct option:

Community psychology is typically practiced in clinics

Community psychology is typically not practiced in clinics

Community psychology place attention on prevention of problems rather than treatment of existing problems

Attempts are made to share psychology with others via consultation

Which of the following phases en-compasses the development of specific, alter-native solutions and strategies of problem solving?

Select correct option:

The entry or preparatory phase

The beginning or warming-up phase

The alternative action phase

Termination

Which of the following phases en-compasses the development of specific, alter-native solutions and strategies of problem solving?

Select correct option:

The entry or preparatory phase

The beginning or warming-up phase

The alternative action phase

Termination

Who developed client centered therapy?

Select correct option:

Carl Rogers

Carl Jung

Sigmund Freud

Maslow

If a clinician might be asked to consult with a colleague on a diagnostic problem involving a specific patient, it will be referring to which of the followings?

Select correct option:

Client-centered case consultation

Consultee-centered case consultation

Program-centered administrative consultation

Consultee-centered administrative consultation

If a person laughs or weeps too easily and often inappropriately; for example shifts from joy to tears to anger very rapidly, his problem will be termed as what of the followings?

Select correct option:

Shallow and labile affect

Impaired judgment

Impaired orientation

Impaired memory

A sizable amount of research has been done to improve psychological preparation for surgery; interventions do not include which of the followings?

Select correct option:

Relaxation strategies

Basic information about the procedures to be used

Cognitive coping skills

Deception about bodily sensations experienced during the procedures

A common feeling among group therapy members, especially when a group is just starting, is that of being isolated, unique, and apart from others is termed as what of the followings?

Select correct option:

Universality

Altruism

Improved social learning skills

Imitative behavior

Which of the followings seeks to modify or change patterns of thinking that are believed to contribute to a patient's problems?
